These replacement baskets are made to specifications that equal, or exceed the original manufacturers specifications.

Basket Construction

STAINLESS STEEL: Standard material is 304 stainless steel. 316 stainless steel is available as an option.

Basket Media Selection

PERFORATED STRAINER AND BAG FILTER BASKETS: For cleanable basket strainers, choose from the following perforation diameters: 1/4, 3/16, 9/64, or 1/16 inch. For filter bag baskets: standard 9/64-inch diameter perforations with 51 percent open area are supplied.

Perforated

With wire mesh lining

PERFORATED WITH WIRE MESH LINING STRAINER AND FILTER BAG BASKETS: Stainless steel wire is used in mesh sizes 30, 60, 100, 150, or 200. When used as a bag filter basket, the following advantages are realized:

- Fiber migration is minimized.
- In the unlikely event of bag rupture, the wire mesh contains the contaminant.
- Bag material cannot become "lodged" in the perforations due to extreme pressure differential.
- Flow characteristics are enhanced when using monofilament bags.
